Skilled Front End Engineer with 4+ years of proven expertise in JavaScript, React, and Node.js. Specialized in Frontend Salesforce, particularly Lightning Web Components (LWC).

Professional Experience

Frontend Developer	Waeg, an IBM Company Lisbon, Portugal	April 2020 - Present
---------------------------	---	-----------------------------

Work in Consultancy, primarily responsible for delivering cutting-edge front-end features for our client-side applications. I have worked in Waeg, an IBM Company, for over 3.5 years.

- Successfully delivered 10+ projects on different clients - Doing mostly frontend work using JavaScript, HTML, CSS, and LWC, collaborating with backend developers and other members of Agile teams.
- Conducted frontend training sessions to 30+ company workers in order to improve their landing pages and basic frontend skills.
- Customized look and feel of standard Salesforce products to the customers' brand and UX/UI design.
- Frequent collaboration with UX/UI design teams through Figma to ensure seamless integration of design elements into LWC-based applications.
- Built custom email templates to use with the Pardot/Account Engagement editor, and landing pages templates with Account Engagement, including testing with Litmus. Proficient in HTML emails debugging and problem-solving, currently being the go-to person to fix related issues.
- Built custom JavaScript and CSS solutions in Account Engagement, to improve the User Experience, such as multi-step forms and an HTML to Text component in LWC.
- Act as Team Leader in the absence of my current Team Leader whenever necessary, attending meetings, approving requests, solving staffing issues.
- Maintaining and adding documentation for our Team, improving frontend quality code throughout the company, keeping up with the most modern tooling and enforcing professional standards.
- Continuous hands-on contribution in 10+ scrum teams, following Agile practices and rituals.
- Created, styled and maintained an internal Wordpress website for clients and partners.
- Helped maintain and bug-fix the company's website, built in React.
- Consistently updated knowledge of the latest LWC features and best practices, ensuring adherence to industry standards and driving continuous improvement in frontend development processes.

Technologies: JavaScript, Salesforce, B2B Commerce Cloud, Jira, Bitbucket, Confluence, Git, Gitlab, Node.js, Account Engagement, Litmus, Jest, Agile, WordPress, React.

Lead Teacher - Part-time	Ironhack Lisbon, Portugal	November 2021 - May 2022
---------------------------------	-------------------------------------	---------------------------------

Ironhack is an international coding school offering intensive courses in Data Science, Web Development and UX/UI Design. At Ironhack I worked as a part time Lead Teacher of the Web Development curriculum.

- I taught and led a group of 10 students through a 6 months, 3 days a week, intensive Web Development bootcamp program.
- Mentored and worked with each student to create 3 projects: A Game (HTML, CSS, Canvas,JS and OOP), a Server side rendered app (Express, MongoDB, Templating engines and Passport.JS) and a Full Stack React app (React, Authentication, Express and MongoDB).
- Helping students with coding challenges, debugging their code, assisting on projects.

- Correcting the students' pre-work and ongoing exercises and providing constructive feedback.

Technologies: JavaScript, React.js, MongoDB, Git, GitHub, Express.js, Jest, HTML, CSS, Canvas, Agile.

Freelance Web Developer

Vinculo Design

January 2020 - Present

Lisbon, Portugal (Remote work for Brazil)

- In my extra time, I frequently work with Vinculo, providing web development services for multiple customers using modern technologies from the company's custom designs, using the software development life cycle as/when required, from, concept, implementation, and testing.

Technologies: JavaScript, React, WordPress, HTML, CSS, Bitbucket, Git, GitHub, MongoDB, Node.js, Express.js, Jest.

Trainee Professional Experience

Ironhack

March 2019 - December 2019

Lisbon, Portugal

- Attended a 9-weeks Web Development Bootcamp, which then evolved to a paid position as a Teaching Assistant.
- I provided assistance also on the Data Analysis Bootcamp, which was teaching Python and Data Analytics.
- Helped students with coding challenges, debugging their code, assist on projects;
- Assisted with classes or workshops related to Javascript, HTML & CSS and related themes;
- Corrected the students' exercises and providing constructive feedback through code reviews;
- Improving each individual student's experience with the program, giving and taking feedback regarding classes and program;
- Supporting the students during and outside classes.

Technologies: JavaScript, React.js, MongoDB, Git, GitHub, Express.js, Jest, HTML, CSS, Canvas, Agile.
